Future Leaders of Creation Science!

Are you a student in high school, college, or graduate school? Would you like to become a member of the Creation Research Society (CRS), giving you access to cutting-edge research in Creation Science? **CRS** members are willing to 'pay it forward' by sponsoring *your* membership in *our* Society. This is an incredible opportunity for you to join the ranks of the world's only professional society for creationists, **at no cost to you**. We consider it an investment in the next generation of creation scientists and professionals.

As a sponsored Future Leader, you will:

- have digital access to our peer-reviewed research journal, the **Creation Research Society Quarterly**
- have digital access to our bimonthly, semi-technical publication, **Creation Matters**
- have digital access to all available back issues of both publications
- be able to participate in the **CRSnet** email discussion forum with fellow creation researchers
- receive special, member-only discounts and offers on books, DVDs, and other materials
- receive advance announcements and member discounts to attend our annual conference

If you agree with our **Statement of Belief** (see reverse) and are currently a student at any public or private college, university, high school, or homeschool program, you may apply for a sponsored membership by completing the application below. When approved, you will be notified by email, providing you with instructions to obtain online access to our materials. As long as funds remain available, your sponsored membership will last until you receive your degree. While we cannot guarantee future funding, we will do everything we can to continue your sponsorship throughout your schooling.

Application for Future Leader Sponsorship

please print legibly

Name* _____ Phone (optional) _____
 Address _____ Email _____
 City _____ State _____ Zip _____

Name of school or institution now attending _____
 Your current status high school, undergraduate, or graduate program MS PhD other _____
 Your major, if college or graduate student _____
 Year you expect to graduate or complete your degree _____

Signature of applicant _____ Date _____
(affirmation of Statement of Belief)

If applicant is under the age of 18:

Signature of parent or guardian _____ Date _____

After completing this application, please send it to the above address.

*The CRS maintains the privacy of your name and contact information. However, if you choose to participate in the CRSnet email discussion forum, you will be making your name and email address available to other CRS-member participants. Please contact the membership secretary if you are a graduate student who needs to use a pseudonym for the discussion group. You may use any email address for CRSnet.

Future Leaders must subscribe to our Statement of Belief:

1. The Bible is the written Word of God, and because it is inspired throughout, all its assertions are historically and scientifically true in the original autographs. To the student of nature this means that the account of origins in Genesis is a factual presentation of simple historical truths.
2. All basic types of living things, including man, were made by direct creative acts of God during the Creation Week described in Genesis. Whatever biological changes have occurred since Creation Week have accomplished only changes within the original created kinds.
3. The great flood described in Genesis, commonly referred to as the Noachian Flood, was an historic event worldwide in its extent and effect.
4. We are an organization of Christian men and women of science who accept Jesus Christ as our Lord and Savior. The account of the special creation of Adam and Eve as one man and one woman and their subsequent fall into sin is the basis for our belief in the necessity of a Savior for all mankind. Therefore, salvation can come only through accepting Jesus Christ as our Savior.

About the Creation Research Society

A number of important principles were established by us in the beginning of our organization's history. First, members of the Society, which include research scientists from various fields of scientific accomplishment, are committed to full belief in the biblical record of creation and early history. Thus, they advocate the concept of special creation (as opposed to evolution), both of the universe and of the earth with its complexity of living forms. All members must subscribe to the Society's statement of belief.

Second, the CRS is unaffiliated with any other organization. In view of the widely divergent church backgrounds of Society members, there is no affiliation of the CRS with any religious group or church body. Obviously, members of the Society are encouraged to participate as individuals in church-related activities.

Third, the essential purpose of the CRS is to research and publish ideas that support creation as an alternate view of origins. The main publication of the Society is the *Creation Research Society Quarterly (CRSQ)*, a peer-reviewed journal which emphasizes original research and the reinterpretation of existing scientific data within the creationist framework. The journal carries both technical and popular articles in most major scientific and allied disciplines, and thus is of interest to individuals from a wide range of backgrounds. The *CRSQ* continues to be recognized worldwide as the premier journal in its field. We also produce a bimonthly publication (*Creation Matters*), containing more popular-level articles.

In the area of research, the Society has established an experiment station, the Van Andel Creation Research Center (VACRC), in north-central Arizona for the purpose of aiding the Society and other visiting scientists in their research efforts. The Society encourages a broad spectrum of research to develop and test a creation model, and administers a research grant program whereby modest funds are approved and distributed to qualified researchers for the conduct and publication of creation-related research.

In recent years, the CRS has sponsored meetings for CRS members. The highlight of the event is the Henry M. Morris Memorial Lecture, featuring a well-known creationist speaker. During these two-to-three-day conferences, members are encouraged to give short presentations regarding new concepts and cutting-edge research in creation science.

Finally, being primarily a research and publishing Society, the CRS does not engage in any lobbying or political activity. Individual members may, of course, exercise their constitutional rights regarding local, state, and national governments.
